

# Enterprise Erase E800

## Why Blanco

As the de facto standard in data erasure, Blanco provides thousands of organizations with an absolute line of defense against costly security breaches, as well as verification of regulatory compliance through a 100% tamper-proof audit trail. Our data erasure solutions have been tested, certified, approved and recommended by 18 governing bodies around the world. No other security firm can boast this level of compliance with the most rigorous requirements set by government agencies, legal authorities and independent testing laboratories.

The E800 Server series is an industrial grade server solution built to meet high-volume loose hard drive data erasure needs.

The Eight Drive Loader carriers integrate into a 4U standard 19" rack mount case delivering a turn-key solution. The E800 can be configured to handle any type of hard drive, including SAS, SATA, IDE, Fiber Channel, and SCSI. One appliance can also be configured to handle multiple types of hard drives.

The Enterprise Erase E800 appliance is used for erasing loose hard drives. The operator inserts hard drives into the erasure bays, locks them in place, and erases them using the Blanco software. The appliance contains eight erasure bays that allow for the simultaneous erasure of up to eight hard drives.

## Key Benefits

**Configurable:** Erase any type of hard drive.

**Customized to Your Needs:** Erase multiple types of drives in the same appliance.

**Hot Swap Ready:** Designed to increase your erasure throughput.

**Digital Bay Numbering:** Easily recognize where the drives are physically connected.

**Fully Operational System:** You supply only a mouse, keyboard and monitor.

**Ease of Use:** Software options built around your business process.

**Digitally Signed Erasure Reports:** Automatically generated and stored in the system; can be exported to external database or into cloud storage.

**Powered Off to Standard Wall Outlet:** No additional power requirements.
